

Congklak – A Traditional Game

How to Make Your Own Congklak Board

YOU WILL NEED:

- 2 photo copies of the stencil activity sheet (Naga - Dragon)
- Thin card or manila folder
- Egg carton (one per student)
- Masking tape
- Glue
- Scissors
- Stapler
- Red kidney beans
(or some other kind of beans/seeds to use as counters)

HOW TO MAKE YOUR OWN BOARD:

- Students use the stencil design provided or create their own.
- Students glue the two copies of the stencil onto card or a manila folder, colour and then cut them out.
- Cut the lid off the egg carton. Cut a 7 – 10 cm section off each end of the lid.
- Using tape or staples, attach these two sections to either end of the bottom of the egg carton. These will become the storehouses or 'ibu' of the board game.
- Staple the stencil design to each end of the egg carton and also staple around the top of the head so that the two stencils are attached and closed at the top.
- Students can then also colour the egg carton on the inside and outside, so that it matches the stencil colouring and the stencil and egg carton appear to be one board game.
- Students are given red kidney beans, enough for six beans per hole.
- Now you are ready to play!
